

BACKLIT FLEX FACE

DAY

NIGHT

PRODUCT DESCRIPTION

Backlit flex faces are manufactured from a flexible translucent vinyl. Our printing process includes printing three layers (image - white - image) using white ink in the middle to make this product illuminate better than most. This results in a backlit that vividly illuminates colors at night while remaining rich and vibrant during the day. After printing, UV Clear Coat is applied for additional protection against fading and abrasion.

SUGGESTED APPLICATIONS

Tension Frame Sign Cabinets

MATERIALS

- » 18oz with low temperature additive
- » 19oz 3M Panagraphics
