

STENCILS

PRODUCT DESCRIPTION

A stencil is a template cut from styrene or adhesive back vinyl. Stencils are usually letters, but could be a simple graphic as well. They're used for chalk or paint advertising ads on any type of flat surface, inside or outside.

Note: A reusable stencil can be made from .040 styrene and a one time stencil can be made from PSV.

SUGGESTED APPLICATIONS

Painting Letters Simple Graphics

Window Etching On-the-Street Paint Ads
